Date of Birth: 05-05-2003 **Military Status:** Registered **Gender:** Male **Driver's License:** B

I am a software engineer with end-to-end product development experience on both the backend and frontend sides. Working in ecosystems primarily based on TypeScript and Java, I develop scalable backend services using NestJS and Spring Boot, and design systems such as JWT-based authentication and data flow management. On the data layer, I work with MongoDB, PostgreSQL, and Oracle Database, and have experience building performance-oriented caching and messaging infrastructures using Redis, Kafka, and RabbitMQ. On the frontend side, I develop both web and mobile applications using React and React Native, allowing me to approach products end-to-end from a single perspective.

Work Experience

Software Engineer Intern

Aug 2023 - Nov 2023

Exo System, Antalya

- Developed the authentication services of an online ordering application end-to-end.
- Designed and implemented functions for order status tracking and management processes.
- Built scalable and maintainable services using NestJS and TypeScript during the backend development process.

Software Engineer Intern

Aug 2024 - Sep 2024

Gümüş Grup, İstanbul

- Developed the frontend of an existing cargo web application using C# and the MVC architecture.
- Improved user experience and performance by enhancing the previously used cookie management application.

Volunteer Work

Mar 2025 - Jan 2026

Brainly

- Developed a Google Chrome extension integrated with the existing web platform to reduce the workload of the moderation team.
- Built the backend services of the extension, which communicates with the platform's REST API, using Java & Spring Boot, and developed the user interface with React, enabling moderation tasks to be carried out more quickly and efficiently.

Education and Qualifications

Software Engineering

Sep 2021 - Jun 2026

Belek University, Antalya

Skills

NestJs • NextJs • Java • SpringBoot • MySQL • PostgreSQL • Redis • Kafka • React • React Native
